

ABSTRACT OF THE DISCLOSURE**THIRD PARTY REGULATION OF CALLS BASED ON THE CALLER AND CALLEE
PAIR TO A CALL**

A method, system, and program for third party regulation of calls based on the caller and callee pair to the call. An identity of a caller to a call and an identity of a callee logged in to receive the call are detected. A selection of third party criteria for regulating a call between the caller identity and the callee identity are accessed. A communication channel between the caller and the callee is regulated according to the selection of third party criteria.
